

Six countries. 85 companies. One platform.

A European engineering and design consulting group, built on a truly entrepreneurial business model.

What makes us unique is the way we do business

"The companies selected to join XPartners are among the best in their field. They know how to do business, and we do not interfere with that. They keep their own name, their own leadership and their own way of working."

When clients work with an XPartners company, they know they are working with one of the leading specialists in the market."
